National News – Significant Events

Danny Weakens to a Tropical Storm, Heads for Leeward Islands

(Reuters) Danny weakened to a tropical storm on Saturday as it headed for the Caribbean's Leeward Islands, the U.S. National Hurricane Center said. The storm, with maximum sustained winds of 65 miles per hour (105 km per hour), was about 520 miles (840 km) east of the Leeward Islands, the center said. Danny was moving west at about 14 mph (22 kph). Tropical storm watches were in effect for Antigua, Barbuda, Montserrat, St. Kitts, Nevis, Anguilla, Saba, St. Eustatius, St. Maarten, Guadeloupe, St. Barthelemy and St. Martin. Danny has diminished in strength since it peaked as a Category 3 storm with 115 mph (185 kph) winds on Friday afternoon.

International News – Significant Events

North, South Korea Talk All Night, to Resume on Sunday, in Bid to End Standoff

(Reuters) Top aides to the leaders of North and South Korea were due to resume talks on Sunday after negotiating through the night in a bid to ease tensions that brought the peninsula to the brink of armed conflict. The meeting at the Panmunjom truce village inside the Demilitarized Zone (DMZ) began on Saturday evening, shortly after North Korea's deadline for Seoul to halt anti-Pyongyang propaganda broadcasts or face military action, and broke before dawn on Sunday. The envoys, shown on TV exchanging handshakes and tight smiles at the start of their meeting, discussed ways to resolve tensions and improve ties, South Korea's presidential Blue House said in a brief early morning statement. The talks were due to resume at 3 p.m. Seoul time (2.00 a.m. EDT). "Both sides are under big pressure to get something out of this," said Jeon Young-sun, professor at the Institute of the Humanities for Unification at Konkuk University in Seoul, who said the length of the high-level meeting may be unprecedented.

SITUATION SUMMARY

Petroleum Sheen/Tarballs, Goleta, Santa Barbara County, SPILL 15-4934 and SPILL 15-4925

On 08/21/15 at 1936 hours, an NRC Report filed by City of Goleta reported a mousse like oil slick at Haskell's Beach in Goleta covering a 1 mile area. A similar situation was also observed at Ellwood Beach. SPILL 15-4925 was created.

- USCG investigated and determined the oil was due to natural seepage.

On 08/22/15 at 1149 hours, an NRC Report filed by a private citizen reported an unknown sheen 1 mile in size observed at 1900 hours on 08/21/15 near 7516 Seagull Drive in Goleta. SPILL 15-4934 was created.

- USCG is investigating to determine if this sheen can be correlated to the sheen at Haskell's Beach.

In addition, on 08/22/15 at 1258 hours, an NRC Report filed by Surfrider Corporation reported observing tarballs covering a 1 mile area at Haskell's Beach at 0700 hours on 08/22/15. SPILL UPDATE 15-4925 was created.

- USCG Sector Los Angeles/Long Beach advised per USCG Marine Safety Detachment on scene, the cause of the reported tarballs was determined to be natural seepage and correlates to the reported sheen from the night of 08/21/15.

There are no requests for assistance or unmet needs.

The California State Warning Center conducted all appropriate notifications, including but not limited to local government agencies.

Cal OES Duty Officers are monitoring the situation and will provide updates as they become available.

Cal EOC Incident – 2014 Drought

- SOC / Inland REOC remains activated in support of 2014 Drought

Weather of Concern

- Increasing upper level high pressure to the east will bring southeast monsoonal flow into Southern California for possible afternoon and evening thunderstorms Monday through Wednesday.
- Strong gusty winds and low relative humidities will result in critical fire weather conditions from Monday afternoon through Monday evening for portions of Modoc County.

Active Weather Warnings, Watches and Advisories by County:

http://www.wrh.noaa.gov/sto/brief/www_bc_cal.php

WEATHER

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:

Eureka Weather:

Dry weather and seasonal temperatures will persist through the weekend as the weather pattern remains benign. Light flow aloft will continue to bring smoke issues to much of northwest California due to active wildfires. Expect morning and evening clouds along the coast with partial clearing in the afternoon.

Medford Weather:

Dispersion of smoke from wildfires will remain the main weather feature of interest, at least for the first half of the week. During the second half of the week, forecast confidence quickly diminishes but there is general model agreement on a trend of strengthening a closed low that will be lurking offshore. This low could bring rainfall to the region and could do so as early as Friday.

Reno Weather:

Areas of haze and smoke are most likely in southern Mono and Mineral Counties through Monday, although lighter haze may linger elsewhere across the region. Above normal temperatures with typical afternoon zephyr breezes are expected each day through Tuesday, with a possible increase in wind speeds and a slight cooling trend later in the week.

San Francisco Weather:

Typical summer weather conditions are expected to prevail through the week as a large area of upper level high pressure remains parked over the southwestern United States. A moderately deep marine layer will persist however, with coastal low clouds and patchy fog moving locally inland night and morning hours. Temperatures will generally be near to a bit above seasonal norms.

WEATHER

WEATHER SYNOPSIS BY REGION:

CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY:

Sacramento Weather:

Mainly dry weather continues this week with near normal temperatures. Hazy/smoky conditions are possible in portions of the area. There is a slight chance of some precipitation over far northern California this coming weekend.

Hanford Weather:

Dry weather can be expected over the area for the next several days. Temperatures will remain near to slightly above normal as the upper-level ridge slowly strengthens through Monday. Mid-level moisture will bring some clouds to the region Tuesday and Wednesday.

SOUTHERN CALIFORNIA:

Los Angeles Weather:

A large ridge of high pressure will build over the Four Corners region today, and remain in place through late next week. As the high extends westward over southern California, a warming trend is expected through Wednesday along with diminishing marine layer clouds. Monsoonal moisture may bring some mid to upper level clouds to the area on Tuesday.

Extreme Southwestern California including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:

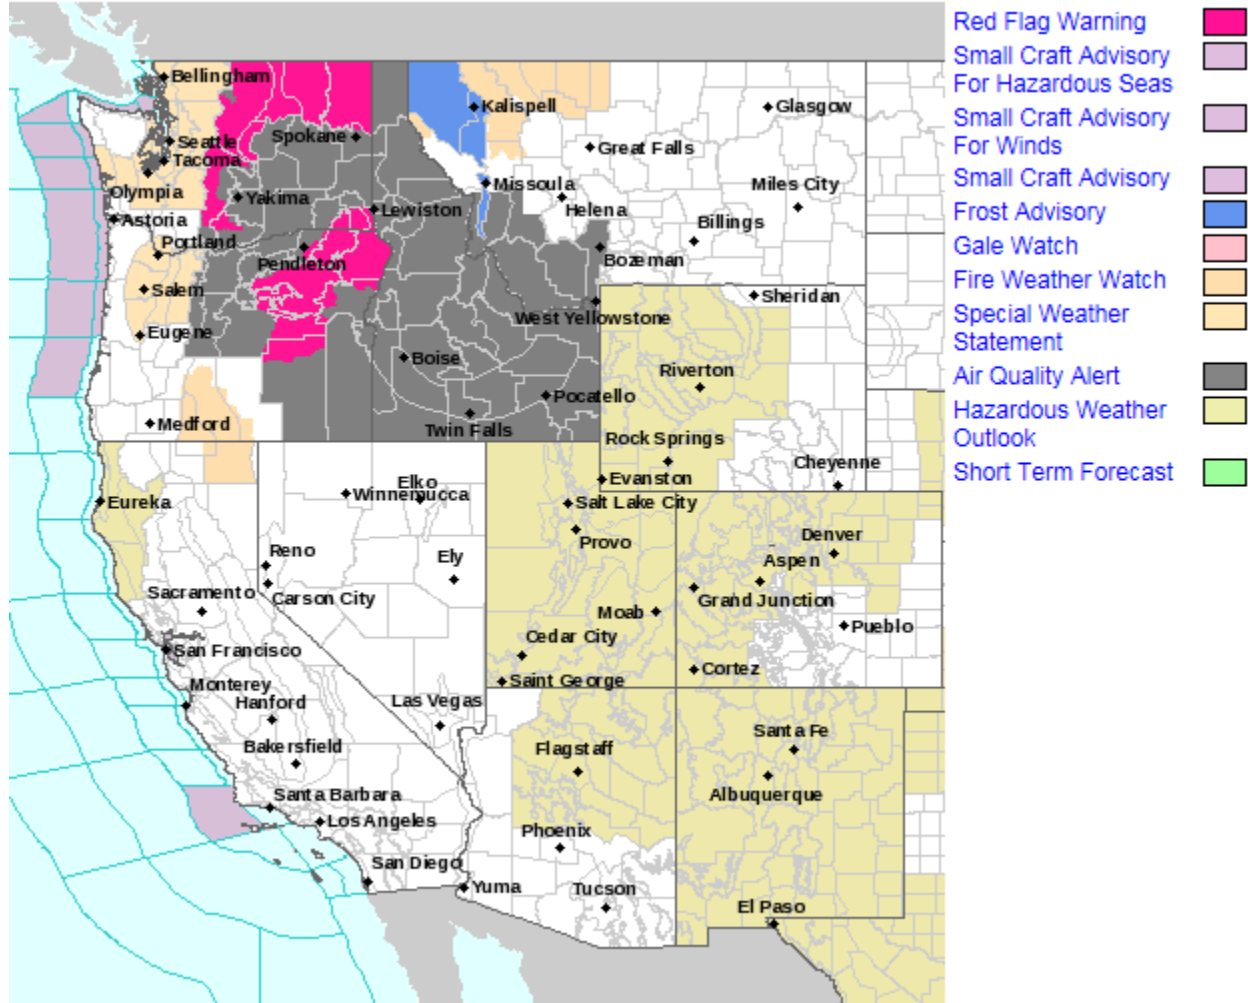

High pressure to the east will bring dry weather and a warming trend today, greatest in the valleys. Monsoonal moisture will spread into the mountains and deserts late Monday, peak Tuesday, and begin to decrease Wednesday bringing a chance of showers and thunderstorms, greatest on Tuesday. Dry with above average high temperatures on Thursday with a slow cooling trend into next weekend. Weak onshore flow and the marine layer will continue night and morning coastal low clouds and fog.

Southeast California Weather:

Hazy conditions will persist the next several days across the Owens Valley and parts of Esmeralda County where smoke from California wildfires will drift towards. Otherwise, slight chances of thunderstorms exist today in Mohave County and again Monday before moisture increases across much of the region by Tuesday and Wednesday. Slow drying is expected Thursday through the weekend.

FIRES, SOUTHERN OPERATIONS AREA

Rough, Vegetation Fire, Fresno County

Location: 5 miles north of Hume Lake and 2.5 miles southwest of Spanish Mountain

Jurisdiction: FRA

Start Time: 07/31/15 at 1933 hours

Per Cal OES, CAL FIRE, and ICS-209 as of [08/23/15 at 0549 hours](#):

- [47,396 Acres, 7% Contained](#)

Evacuations/Shelters:

- Mandatory Evacuation Areas:
 - The Hume Lake Christian Conference was evacuated 08/18/15. Per the Cal OES Law Duty Officer (LDO) evacuation was accomplished in less than 2 ½ hours due in significant part to prior planning between Fresno Sheriff and the Camp Staff. The group of 750 to 1000 people were evacuated to a sister Church in Fresno for sheltering.
 - There are 250 mandatory evacuations in the National Park Campgrounds in the immediate area of Hume Lake Christian Camp.
 - There has been an evacuation of 32 private residences, believed to be all vacation homes in the Big Meadow and Heart Meadow Neighborhood.
 - Approximately 1,500 campers in several Kings Canyon National Park Campgrounds located along 10 Mile Rd have been placed under mandatory evacuation.
- EOC Activations: Fresno County EOC is activated at Level 1 for the weekend.
- The California Highway Patrol has also moved the road closure, which had been located at the intersection of Highway 180 and Hume Lake Road. The new road closure now sits further south on Highway 180 at Grant Grove Tree (approximately 2 miles north of the Hwy. 180 and Hwy. 198 interchange). The roadway will remain closed until authorities determine it is safe to reopen. The Sheriff's Office wants to make the public aware that no one will be allowed to enter the Hume Lake area; people will only be allowed to exit.
- Per CUEA, PG&E critical facilities and distribution assets are no longer in a high risk category for threats to power serving Central California. CAISO has reviewed PG&E facility locations that may be impacted by the fire and none of the locations would compromise the grid in any capacity. There would be no brownouts if these sites were impacted.

Mission:

We protect lives and property, build capabilities, and support our communities for a resilient California.

We achieve our mission by serving the public through effective collaboration in preparing for, protecting against, responding to, recovering from, and mitigating the impacts of all hazards and threats.
